

**RESOLUTION BY ICCAT
FOR INTEGRATED MONITORING MEASURES**

CONSIDERING that the monitoring of compliance with conservation measures is an essential element for the success of these measures;

NOTING that ICCAT has already adopted several monitoring measures;

FURTHER NOTING that integrated monitoring measures are desirable and efficient;

CONSIDERING that integrated monitoring measures should take into account the characteristics of the fisheries and the fishing areas covered by ICCAT;

RECOGNIZING that this is a complex task, but that it should be initiated without delay;

THE INTERNATIONAL COMMISSION FOR THE CONSERVATION
OF ATLANTIC TUNAS (ICCAT) RESOLVES:

- 1 That a Working Group be established to develop integrated monitoring measures, in accordance with applicable international law, such as the United Nations Convention on the Law of the Sea, the 1995 United Nations Agreement on Straddling Fish Stocks and Highly Migratory Fish Stocks, the FAO Compliance Agreement, the FAO Code of Conduct, and appropriate FAO International Plans of Action (IPOAs), for fisheries managed by ICCAT.
- 2 That in carrying out this task, the Working Group will:
 - a be supported by the ICCAT Secretariat;
 - b establish a time schedule for the development of its work, and will hold at least one meeting during 2001 before the next Commission meeting; and
 - c invite observers attending ICCAT meetings, the FAO, and other regional fishery organizations to participate in the meetings of this Working Group.
